

## MISSION

The first task is about the Session-Based Testing approach, and with this, we would like to evaluate the following.

- How you approach unknowns.
  - How you perform exploratory testing.
  - How you communicate your feedback.
  - The work task shouldn't take more than a couple of hours in total and, to get started, please use the following link: <https://sites.google.com/eyeem.com/qatask/home>.
  - Perform a Session-Based Testing approach on the Signup flow of EyeEm (<https://www.eyeem.com/signup>) and provide us with a testing report.
- 

## CHARTER

Analyze the signup flow of EyeEm and report on areas of potential risk.

#Areas:

1. Chrome | Version 84.0.4147.89
2. Safari | Version 13.1.2
3. Chrome responsive mode for iPhone X, Galaxy fold, iPad Pro, and Moto G4.

#Strategy:

1. Session-Based Testing.
- 

## START

14/08/2020 10:00 am.

---

## TESTER NAMES

Livia Bonifácio

---

## TIME BREAKDOWN

#DURATION: short (45 minutes).

#TEST DESIGN AND EXECUTION: 90 minutes.

#BUG INVESTIGATION AND REPORTING: 1.

---

## DATA FILES N/A

---

## TEST NOTES

Flow tested:

- Sign up as image Buyers.
- Sign up as Photographers.

I touched each of the functions below but mainly focused on successfully signing up new users.

View:

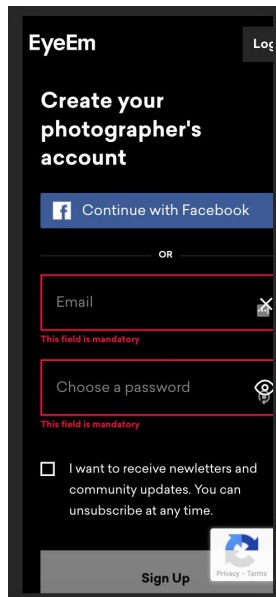

- Let's start screen.
- Sign up with Google for a Business account.
- Sign up with Facebook for a Photographer account.
- Sign up with an email and password for both.
- Check newsletters.
- Not checking newsletters.
- Open Terms and Privacy Policy.
- Required fields.
- Successful signup.
- Layout alignment.
- Passwords can be weak, medium, or strong.
- Email already registered.
- Log in and out with the new user.

Risk:

- It is possible to verify that the registration at the front-end is working as expected since after registration the user is logged in, but I have not checked whether the data is being sent to the Backend. Should we have our users registered on the backend as well?
-

## BUGS

#BUG 01: For the Galaxy fold phone model, the layout is cut, not aligned on the screen.

Steps:

- Access the Sign Up flow for Buyers and photographers.

Expected result: Layout aligned according to the screen size.

---

## ISSUE

#ISSUE 01: As a user, can't I use the same email to create an account as a Buyer and another as a Photographer?

#ISSUE 02: It is possible to create an account for buyers using Google and for photographers using Facebook. Is that what is expected? Why can't photographers create an account with Google?

---
